Horizon Printed Circuits Lead-Free RoHS Assembly

ROHS PROTOTYPE ASSEMBLY

Horizon Printed Circuits has designed a robust Pb free process that is flexible enough to allow us to work in prototype quantities or short run production quantities. Prototypes are processed with the same controls used in longer runs.

LEAD FREE CAPABILITIES

- Printed circuit board assembly of SMT or PTH
- Lead free rework
- ROHS Printed Circuit Board Fab (contact us)
- ROHS component selection (contact us)

Horizon Printed Circuits maintains a strict set of assembly guidelines that are proven to deliver top quality circuit boards. Our process assures that our assemblies will meet RoHS directives. Horizon Printed Circuits can also provide guidance to assist your conversion to Lead-Free and RoHS compliance.

If you have concerns about your printed circuit board assemblies meeting the RoHS directives we will be glad to help. Contact us about our RoHS conversion services. We can evaluate your BOM for RoHS compliance and can further aid in the RoHS transition by suggesting alternative components that meet the specifications.
